

BRAND STRATEGY & IDENTITY

FirstUser

Meet your first user.

An AI product research agent

A BuildNest Studio product · Created by Ifeoma O. Anyanwu

Version 1.0

THE PROBLEM

You know your product too well.

As teams build, iterate, and improve, they develop internal knowledge new users never had. That familiarity quietly erases their ability to experience the product like a first-time visitor.

THE PROBLEM

What first-time visitors don't know

- What the product does

- Where information lives

- What terminology means

- What to click

- What happens next

- Whether to trust the product

What feels obvious to you may be invisible to a new visitor.

YOU

How it works.

The terminology.

Where every page lives.

What happens after "Get Started."

YOUR FIRST-TIME VISITOR

None of it.

THE IDEA

Introducing FirstUser

FirstUser is an AI product research agent designed to experience websites from the perspective of someone seeing them for the first time. Give it a website and a question — it explores, observes, gathers evidence, and reaches a conclusion based on what it actually encountered.

THE IDEA

THE CORE LOOP

OBSERVE → INVESTIGATE → INTERACT → GATHER EVIDENCE → CONCLUDE

This loop defines both the product and the brand. Every conclusion should trace back to what was actually observed.

THE INTELLIGENCE BEHIND FIRSTUSER

Meet Solari.

Solari is the research agent behind FirstUser's investigations. FirstUser is the product experience customers interact with; Solari powers the investigation behind the scenes — making research decisions, gathering evidence, and helping FirstUser reach a defensible conclusion.

OBSERVE → DECIDE → ACT → OBSERVE AGAIN → **GATHER EVIDENCE** → EVALUATE

THE INTELLIGENCE BEHIND FIRSTUSER

FIRSTUSER

THE PRODUCT EXPERIENCE

SOLARI

THE RESEARCH INTELLIGENCE

Website exploration → Evidence → Findings → Verdict

BRAND STRATEGY · PURPOSE

To help teams see their products through fresh,
evidence-backed eyes.

VISION

A future where teams understand what their products actually communicate to new users — before confusion becomes churn, abandonment, or lost trust.

The experience itself contains evidence. Someone just needs to investigate it without assumptions.

MISSION

To make first-time user perspective accessible,
continuous, and evidence-driven.

FirstUser helps founders, product teams, designers, and growth teams ask better questions about their products — and receive answers grounded in what a visitor can actually observe.

BRAND POSITIONING

An AI Product Research Agent

NOT

~~Website analytics~~ ~~UX checkers~~ ~~Chatbots~~ ~~Browser automation~~ ~~Generic AI agents~~

BRAND PROMISE

01

Fresh perspective

FirstUser arrives without internal knowledge of your product.

02

Evidence-backed findings

Every conclusion is traceable to what was actually observed.

03

Honest uncertainty

FirstUser won't invent information just to give an answer.

CORE BELIEF

The people who build a product
are often the least qualified
to judge whether a first-time user
understands it.

BRAND PHILOSOPHY

Observation *before* opinion.

Evidence *before* certainty.

Curiosity *before* assumption.

Traceability *before* magic.

Honesty *before* completeness.

BRAND PERSONALITY

Thoughtful Curious **Observant** Evidence-driven Calm Honest

Sophisticated

PERSONALITY SPECTRUM

Intelligent

not Pretentious

Technical

not Developer-centric

Premium

not Cold

Calm

not Bland

Confident

not Overconfident

VOICE & MESSAGING

A sharp product researcher explaining what they found.

VOICE PRINCIPLES

01 Specific

02 Evidence-based

03 Clear

04 Calm

05 Honest

VOICE EXAMPLES

~~The website has some usability problems.~~

The next step is unclear after the visitor understands the product.

~~Pricing looks good!~~

Pricing is clear, but I couldn't find enough information to estimate potential recovery performance.

~~Unable to determine.~~

FirstUser couldn't determine whether the product is financially worthwhile because the website doesn't quantify typical recovery performance.

CORE MESSAGING

Meet your first user.

See your product through fresh eyes.

Don't just get an answer. See what supports it.

FirstUser would rather say "I don't know" than make something up.

MANIFESTO

You know your product too well.

Your first-time visitor doesn't.

FirstUser starts without assumptions.

It explores. It observes.

It gathers evidence.

Then it tells you what it found.

Meet your first user.

VISUAL IDENTITY

Observation.

Focus · Perspective · Discovery · Traceability · Evidence

Meet your first user.

Heading 1 / 56

Investigation complete.

Body / 28

Pricing is clear, but recovery performance isn't quantified.

THE OBSERVATION MARKER

"FirstUser noticed something here."

- **OBSERVATION**

Pricing information is available, but typical recovery performance is not quantified.

EVIDENCE AS A BRAND OBJECT

Finding → Context → Source → Screenshot

Starter plan matches the visitor's situation

Starter supports up to ¥2M in failed payments per month.

WHY IT MATTERS

Matches the failed-payment volume in the mission.

SOURCE

Pricing

[VIEW EVIDENCE](#)

PRODUCT VISUAL LANGUAGE

The browser is the hero.

During Live Exploration, the session should dominate. Screenshots are treated as evidence, not attachments — given space, page context, and a direct line to the finding they support.

THE TRUST RULE

DEMO SESSION $\neq$ LIVE SESSION

Never present simulated website activity as real analysis.

THE EMOTIONAL JOURNEY

CREATE TEST

"I have a question."

LIVE EXPLORATION

"FirstUser is actually experiencing my website."

REPORT

"Now I understand what a first-time visitor would conclude."

TRUST & NORTH STAR

TRUST PRINCIPLES

Never fake evidence.

Never imply a website was visited when it wasn't.

Always make conclusions traceable.

Make uncertainty useful.

Never manufacture precision.

EVERY FINDING SHOULD ANSWER

1. What was observed?
2. Why does it matter?
3. What evidence supports it?
4. What should happen next?

FIRSTUSER

Meet your first user.

Fresh eyes. Real evidence.
