

FIRSTUSER

INVESTIGATION Nº001

Can a first-time visitor decide whether to trust Reclaim?

TARGET

reclaim.buildneststudio.com

RESEARCH PERSPECTIVE

First-time visitor

THE QUESTION

Before connecting a payment product to her Paystack account, a founder has a simple question:

“Can I trust this?”

Reclaim helps businesses recover revenue from failed payments. But before a first-time visitor connects sensitive payment infrastructure, she needs to understand:

What exactly does this product do?

Is it relevant to my business?

How does it work?

What will it cost?

What access does it require?

Why should I trust it?

Persona visual — abstract portrait placeholder
or [browse files](#)

Maya

Founder of a growing online business

Her business uses Paystack to collect payments. Some customer payments fail. She suspects lost revenue is accumulating but does not have a team manually following up on every failed transaction.

PRAGMATIC · BUSY · SKEPTICAL · COMFORTABLE WITH SOFTWARE, NOT HIGHLY TECHNICAL

“Can this help me recover money I’m losing without creating more work for me?”

What did Maya ask FirstUser to investigate?

“You are Maya, a founder visiting Reclaim for the first time. Your business uses Paystack to collect payments, and you suspect failed transactions are causing lost revenue. Investigate the website to determine whether Reclaim is relevant to your business, how it works, what it costs, what access it requires, and whether you have enough evidence to trust it enough to connect your Paystack account.”

DO NOT ASSUME.
FOLLOW THE EVIDENCE.

If the website does not provide enough information to answer an important question, FirstUser should say so.

Seven questions. One decision.

01 UNDERSTANDING What does Reclaim actually do?

02 RELEVANCE Is it relevant to Maya's business?

03 MECHANISM How does failed-payment recovery work?

04 ECONOMICS What does Reclaim cost?

05 EVIDENCE What proof exists that it works?

06 TRUST What access does it require?

07 ACTION Does Maya know what to do next?

**WOULD MAYA CONNECT HER PAYSTACK
ACCOUNT?**

FirstUser doesn't simply browse.

OBSERVE → DECIDE → ACT → OBSERVE AGAIN → GATHER EVIDENCE → EVALUATE

The journey is not predetermined. FirstUser decides what to investigate based on the visitor's mission and what it discovers along the way.

FIRSTUSER

SOLARI

The research intelligence

Website exploration → Evidence → Findings → Verdict

The investigation begins.

TARGET WEBSITE

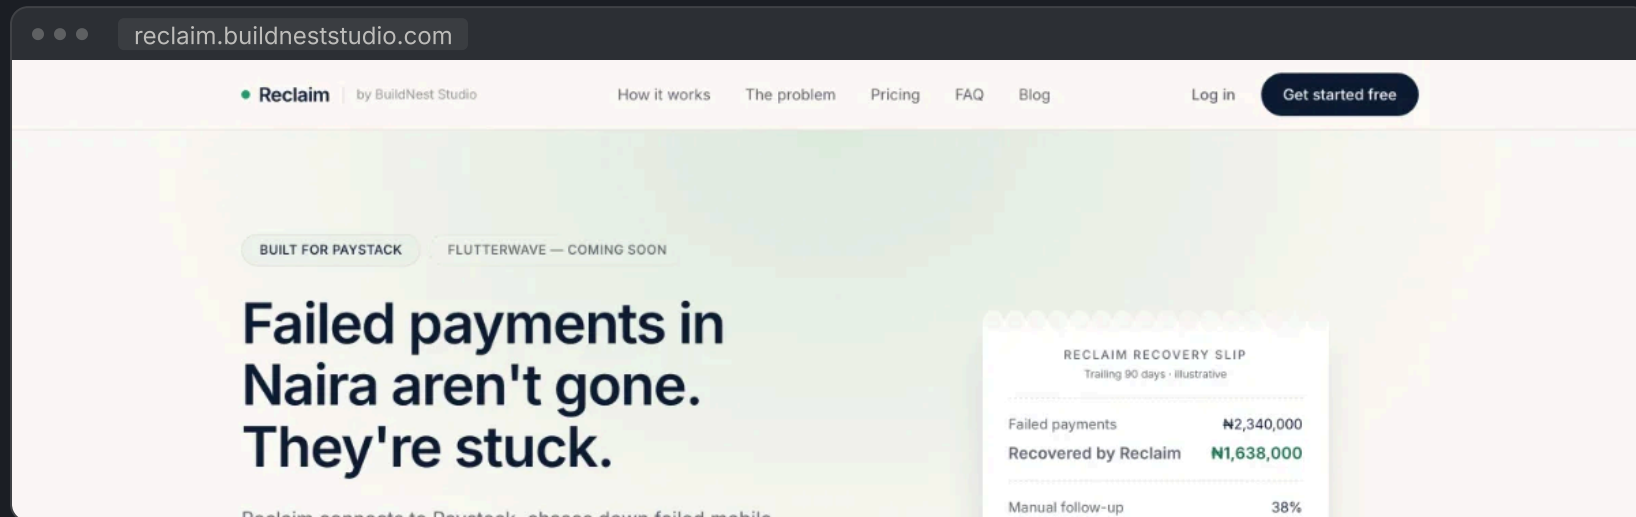

reclaim.buildneststudio.com

PERSONA

Maya

MISSION

Determine whether Reclaim is relevant, understandable, financially clear and trustworthy enough to connect to Paystack.

THE JOURNEY

Where FirstUser went.

01 · STARTING POINT

Create — Explore — Report

What do you want to learn about your website?

Give FirstUser a website and a question. It explores the experience like a first-time visitor, gathers evidence, and tells you what it found.

WEBSITE

https://reclaim.buildneststudio.com

PERSONA

Nigerian business owner

Starting an investigation sends this website, persona, and mission to a real FirstUser browser session.

CHOOSE WHAT TO INVESTIGATE

Can visitors understand my product?
As a first-time visitor, can I understand what this product does, who it's for, and why I should care?

Can visitors figure out how to get started?
Can a first-time visitor understand what to do next and successfully get started?

Would visitors trust this product?
Do I have enough information and confidence to trust this product?

Would visitors sign up?
As a potential customer, do I have enough information and confidence to sign up?

Can visitors find what they need?
Can a first-time visitor find important information without getting confused or lost?

Can visitors complete a task?
Give FirstUser a specific task to investigate.

Ask my own question

I have about ₦2M in failed payments per month. Decide whether Reclaim is financially worth using. Use only evidence available on the website. Do not make up a recovery rate, expected recovery amount, or any other financial assumption.

RESEARCH RULES

☒ Evidence only
Use only evidence from the website. Don't assume or invent information that isn't available on the site.

☒ Explore before deciding
Explore the website thoroughly enough to understand the core product before deciding whether more information is needed.

☒ Allow UNCERTAIN

BUILT FOR PAYSTACK

FLUTTERWAVE — COMING SOON

Failed payments in Naira aren't gone. They're stuck.

Reclaim connects to Paystack, chases down failed mobile money, card, and bank transfer payments with SMS follow-up, and gets most of it back — priced in Naira, and free until we recover something.

See what it costs

How it works

Connects to Paystack. Follows up on every failed payment. Sends SMS to your customers.

RECLAIM AS COORDINATOR

Failed payments ₦1,243,000

Recovered by Reclaim ₦1,038,000

Manual follow-up 30%

With Reclaim 79%

APPROX. 80% RECOVERY

Reclaim recovers 80% of your failed payments. Send us your failed payment details.

FIRSTUSER BY BUILDNEST STUDIO

THE JOURNEY

How it resolved.

03 · DEEPER INVESTIGATION

FirstUser follows emerging questions based on what it observes during the journey.

04 · EVIDENCE CHECK

FirstUser verifies whether the available evidence supports a defensible conclusion.

05 · CONCLUSION **VERDICT**

Actual journey to be populated from live investigation data.

FOLLOWING THE EVIDENCE

A conclusion is only as strong as its evidence.

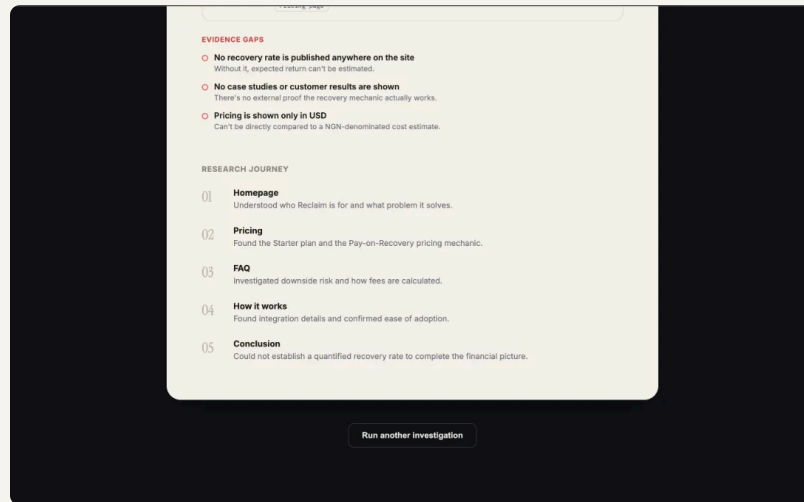

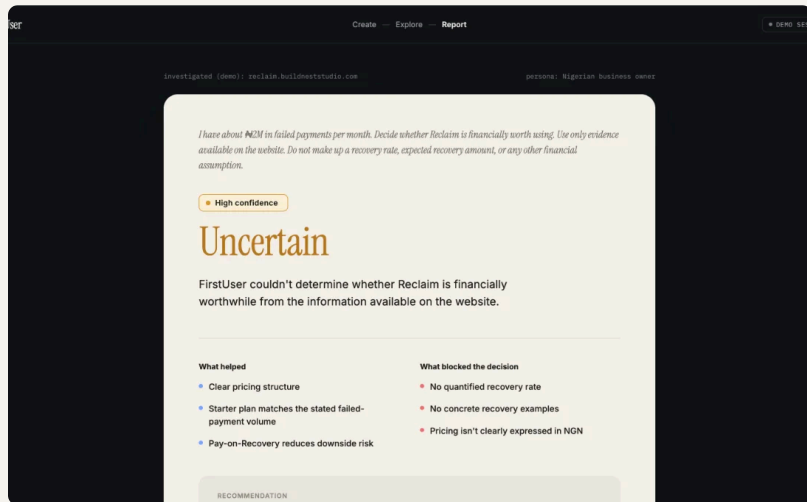

OBSERVATION → EVIDENCE → INTERPRETATION → CONCLUSION

FINDING

Finding pending live investigation.

WHY IT MATTERS

Why this affected Maya's decision

Knowing what you don't know is part of the research.

UNCERTAINTY IS A FINDING.

FirstUser should not fill gaps with assumptions. If the available evidence is insufficient, the correct output is **UNCERTAIN**.

EVIDENCE TRAIL

- Starter plan supports up to N2M in failed payments per month**
Matches the visitor's stated failed-payment volume exactly.
Pricing page
- Fees only apply under the Pay-on-Recovery model**
Removes the downside risk of paying for a service that doesn't recover anything.
Pricing page
- The homepage clearly states who Reclaim is for**
A first-time visitor can quickly tell if this applies to their business.
Homepage
- Integration takes a single API key, no checkout changes**

MISSION

You are Maya visiting Reclaim for the first time. Determine whether Reclaim can help recover failed payments, how it works, what it costs, what access it requires, and whether you would trust it enough to connect your Paystack account.

JOURNEY

→ Opened homepage

WHY THIS MATTERS

This is more than a website review.

A website can contain all the right information and still fail to help a visitor reach a decision. FirstUser investigates from the visitor's perspective.

It doesn't ask: *"Is this page good?"*

It asks: *"Did this visitor find enough evidence to make their decision?"*

WEBSITE → VISITOR MISSION → REAL EXPLORATION → EVIDENCE → DEFENSIBLE CONCLUSION

From investigation to product intelligence.

Once the live investigation is complete, this case study will contain:

01 · Actual pages visited

02 · Actual actions taken

03 · Actual screenshots

04 · Actual evidence collected

05 · Actual unanswered questions

06 · Actual findings

07 · Evidence-backed verdict

FirstUser doesn't simulate what a visitor might think. It investigates what the visitor can actually discover. This is the promise.

FIRSTUSER

See your website through fresh eyes.

Give FirstUser a website, a visitor and a mission. See what the visitor discovers.
